**NOTICE:** A parent or guardian may exempt their child from some or all vaccinations listed below by submitting this completed form to the child's school and/or child care. A person who has been exempted from a vaccination is considered at risk for the disease or diseases for which the vaccination offers protection. Exempted children/students may be excluded from school or child care settings and activities during an outbreak of the disease that they have not been fully vaccinated against. The diseases vaccines can protect against still exist, and can spread quickly in school and child care settings. Immunizations are one of the best ways to protect people from getting and spreading diseases that may result in serious illness, disability, or death.

## Medical Exemption *Licensed Health Care Practitioner (MD, ND, DO, ARNP, PA) completes this section.*

A health care practitioner may grant a medical exemption to a vaccine antigen required by rule of the state board of health only if in his or her medical judgment, the vaccine antigen is not advisable for the child. When it is determined that this particular vaccine antigen is no longer contraindicated, the child will be required to have the vaccine ([RCW 28A.210.090](http://www.wa.gov/rcw/default.aspx?title=28&chapter=28A&section=210)). Guidance for medical exemptions for vaccination can be obtained from the contraindications, indications, and precautions described in the vaccine manufacturer's package insert and by the most recent recommendations of the Advisory Committee on Immunization Practices (ACIP) available in the Centers for Disease Control and Prevention publication, Guide to Vaccine Contraindications and Precautions. This guide can be found at the following website: <https://www.cdc.gov/vaccines/hcp/acip-recs/general-recs/contraindications.html>
